# INTRODUCTION

---

*Welcome to Karratha Senior High School, a school that prides itself on being able to cater for the needs of all students. We strive to shape futures, by developing the potential of every student and empower them to make positive choices in their lives, as contributing citizens. For those who are already associated with our school, you will appreciate what a great school we have, the amazing opportunities offered to all students and the dedication and commitment of staff. To those new arrivals, welcome, and I am confident you will realise what a great choice you have made in becoming part of the Karratha Senior High School community.*

*I encourage you to review our current Business Plan 2021-2024, available either on our website or from the school, to gain a deeper understanding of the strategic direction of our school.*

*The information contained in this booklet introduces you to the subjects offered to Year 10 students in 2024. There is also additional information on other aspects of the school, including the support services and programs in place at the school, to help ensure a warm and inclusive environment for all students. Information on contributions and charges is also detailed in this booklet, so you are fully aware of your financial obligations.*

*The subjects and programs offered are designed to meet the needs of all students. Clear pathways are structured so students can select subjects which will allow them to develop the skills and knowledge to actively engage in their learning and prepare them for Years 11 and 12 and beyond school Towards Tomorrow.*

*As a school, we are committed to developing strong ongoing partnerships with parents/caregivers because we know that working together in the education of your child, will deliver more positive outcomes. Please take the time to read all the information in this booklet. I am confident you will get a real sense that at Karratha SHS we can offer an education for your child that is supportive, comprehensive and challenging.*

*We look forward to working with you, and in providing outstanding educational opportunities for your child.*

*Regards*

Ashley Eversden  
PRINCIPAL

# CURRICULUM OVERVIEW

---

## Western Australian Curriculum

The Western Australian Curriculum is fully implemented at Karratha SHS, which is a mandated requirement for all WA schools. The WA Curriculum provides a comprehensive set of prescribed content and achievement standards. We use these to plan student learning programs, assess student progress and report to parents. The learning areas encompassed by the Western Australian Curriculum include English, Mathematics, Science, Humanities and Social Sciences, Health and Physical Education, Technologies, The Arts and Languages.

General capabilities in the Western Australian Curriculum encompass the knowledge, skills, behaviours and dispositions that will assist students to live and work successfully. The general capabilities are addressed through each learning area at Karratha SHS and are embedded in all learning programs.

The general capabilities are:

- Literacy
- Numeracy
- Information and Communication Technology
- Critical and creative thinking
- Personal and social capability
- Ethical understanding
- Intercultural understanding

# ASSESSMENT AND REPORTING

---

Student achievement will be assessed in each program of study. Assessment will be carried out continuously and will be a measure of your child's progress towards attaining the outcomes of the subjects being studied. Typical assessment methods include written and objective tests, assignments, models and projects, experiments, open-ended tasks and portfolios.

Teacher judgements about your child's performance are based on knowledge of your child's work that is gained over time and in a range of situations. Each assessment contributes to a cumulative evaluation of performance.

The school will provide regular reports on your child's achievement throughout the year. These will comprise;

- ✓ an interim report towards the end of Term 1;
- ✓ a mid-year report; and
- ✓ an end-of-year report.

Parents can also obtain Progress Reports by contacting individual classroom teachers or Student Wellbeing at any time and can access classroom assessment results via Connect.

There are two parent evenings throughout the year where staff are available, by appointment, to specifically discuss individual student progress. Parents will be made aware of these dates for 2024.

## **Connect**

Connect is an online learning environment that students can use to access information and course materials regarding their subjects, and parents can use to monitor their child's progress at school. Connect allows students and parents to communicate easily with teachers, stay informed with their learning anywhere at any time, securely access assessments and feedback, and engage in their learning outside of the classroom.

Students can log in to Connect at school or home using their normal student username and password. Parents can log in using a department-supplied secure username to access their child's Connect classes and see their child's results on assessments and daily attendance. Parents will need to supply the school with an email address in order to receive their login details for Connect.

Formal reports are made available to parents through Connect at the end of Semester 1 and the end of the year. Parents will receive an email notification that the report is available, and it will be stored on Connect and can be downloaded anytime.

# STUDENTS WITH A DIAGNOSED DISABILITY

---

Students with disabilities are supported in a number of ways across Karratha Senior High School. On enrolment each student's individual needs and capabilities are examined to find the best placement for them; mainstream classes or the Inclusive Learning Unit (ILU).

Karratha SHS is an inclusive school, students who have a disability often attend all mainstream classes. We support these students by creating a Special Educational Needs (SEN) plan, and with the assistance of a Special Needs Education Assistant in their classes, if needed. SEN plans are individualised, consisting of goals and strategies used to achieve the goals. Adjustments are made by the classroom teacher in class to support the student's needs for participation, curriculum access and assessment.

The Inclusive Learning Unit (ILU) is set up for students who have difficulties accessing the mainstream curriculum. The ILU has four classrooms which run an alternative program for students with varying disabilities. Teaching and learning is highly individualised to address the needs of each student. Each class has a classroom teacher who teaches all curriculum areas; the students attend mainstream electives with the support of an Education Assistant. Some subjects are taught to the ILU cohort by specialist mainstream teachers

In the ILU, students in Year 7, 8, 9 and 10 engage in all MESHH subjects using the WA curriculum (ABLEWA and the K10 Syllabus), modified to their level in addition to ASDAN programs. The classroom teacher has a strong focus on the development of Literacy and Numeracy skills through all subject areas. Direct and Explicit Instruction programs (Reading Mastery, Spelling Mastery and Letters and Sounds) are used to increase the students' reading & writing abilities. Students in the ILU are also taught independence by learning life skills, careers pathway planning, community access and through our Social and Emotional Skill program – You Can Do It Education.

# STUDENT WELLBEING

---

The Student Wellbeing team works to meet the diverse needs of students. The team promotes personal, academic and social excellence among students and staff and discourages those influences that can work against the attainment of these standards. The team provides holistic support to assist students in achieving their academic and personal potential.

The Student Wellbeing team includes the following staff/services:

- Deputy Principals (Years 7/10, 8/11 and 9/12)
- Three Student Wellbeing Coordinators (Years 7/10, 8/11 and 9/12)
- Six Year Coordinators
- Two School Officers (Student Wellbeing Reception)
- School Nurse
- Two School Psychologists
- Chaplain
- Three student Support Officers
- Attendance Officer
- Five AIEOS

## ***Student Wellbeing Coordinators***

The Student Wellbeing Coordinators oversee matters relating to individual students and their welfare, carrying out a significant role in supporting the overall planning and organisation of student activities at the school. The Student Wellbeing Coordinators are an excellent point of contact in all matters relating to student performance and wellbeing.

## ***Year Coordinators***

Year Coordinators play an important part in the provision of support and care for students at Karratha Senior High School for a specific cohort. In particular, they have a pivotal role in promoting the value of Care and the school's "*Towards Tomorrow*" motto.

## ***School Dress***

A School Dress Policy is endorsed by the School Board and completion of the Enrolment Form implies an acceptance of and adherence to the School Dress Code regarding uniform. This policy is in place for the safety of all students. Students in our school uniform are readily identifiable in our community and we are proud of our dress code. All items of School Dress Code are available for purchase at the school.

- Students in Years 7 to 10 wear a Red and Navy shirt.
- Students in Years 11 & 12 wear a White and Navy shirt.

## *Student Use of Mobile Phones*

# **Karratha Senior High School - Mobile Phone & Headphones Policy**

**Mobile phones are not permitted to be used by students at Karratha Senior High School between the hours of 8:20 – 2:30.**

*If a student has a mobile phone or headphones visible the procedure is as follows:*

1. Reminder of KSHS behaviour expectations “We have phones and headphones off and away all day, 8:20 – 2:30”
2. If the student has the phone or headphones out again, the student will be asked to turn off their phone and hand it over to their teacher
3. The phone will be placed in an envelope with the student’s details written on it
4. The teacher will take the envelope with the phone to the Administration Office before 2pm
5. The administration staff will record the student’s name and keep the envelope in a filing cabinet for the day. SWB will email notification home to the parent.
6. Confiscation 1, 2 and 3 – the student can collect their phone at the end of the day
7. Confiscation 4: The parent will be contacted, and they will need to collect the phone at the end of the day.

If a student refuses to follow a teacher’s instructions, then the normal BMiS policy applies. As per the Department of Education Mobile policy (poster below) there may be circumstances where students can use their phone/headphones.

Exceptions are:

- Completion of tasks that cannot be completed on a computer or laptop.
- As part of a student’s individual support plan.

This needs to be approved by a HOLA, SWB Co-ordinator, Deputy Principal or Principal.

# CONTRIBUTIONS AND CHARGES IN SCHOOLS: A Guide for Parents

PARENT contributions go towards the cost of certain materials, services and facilities directly used or consumed by students. These contributions assist schools in the provision of textbooks or text material.

## CONTRIBUTIONS

The school can request a contribution of up to \$235.00 per student per year in Years 7 to 10.

This contribution is towards the cost of providing an educational program that meets the requirements of the curriculum framework. The contributions collected from parents are used towards providing materials, services and facilities directly used or consumed by students, including hire of textbooks or the provision of text material.

The School and School Board approve the level of contributions. The costs are detailed on the school contributions and charges list.

This contribution is voluntary. It is expected that those who can afford to will make the contribution.

Schools offer a range of payment options to assist parents. Please discuss this with the Manager Corporate Services.

For parents of secondary students who have a Family Health Care Card the contribution can be reduced by applying through the Secondary Assistance Scheme. This scheme provides payment towards the parent contribution as well as a clothing allowance. Application forms are available at the school.

Where students elect to participate in extra cost optional components (including post-compulsory), compulsory charges will apply.

## CHARGES

Charges apply to high cost options (called extra cost options) in Years K to 10 that are alternative to parts of the program covered by the contribution. Students can opt to select these.

Extra cost options are also specific activities, services or facilities that schools offer for students to use or take part in. Excursions such as camps, the school yearbook and school social activities are examples. Students opt to take part in these activities or use the services or facilities. The charge associated with the provision of these activities, services or facilities must be paid. The charge covers the cost of providing the service or running the activity.

The School and School Board approve the level of charges. The costs are detailed on the school contributions and charges list.

All Senior School courses or programs are treated as extra cost options; charges apply and must be paid.

Schools offer a range of payment options to assist parents. Please discuss this with the Manager Corporate Services. For parents of secondary students who have a Family Health Care Card the Senior School charges can be reduced by applying through the Secondary Assistance Scheme. This scheme provides payment towards the course charges as well as a clothing allowance. Application forms are available at the school.

Parents are also responsible for the provision of a student's personal items. Where students wish to make use of other optional services provided by the school they will be liable for the costs.

## OTHER COSTS

### *Personal items*

These are personal items that students need to own. The list is detailed and provided to parents with the school contributions and charges list. These can be purchased from any supplier.

The School and School Board approve this list.

### *Other services*

These are services or facilities which students might choose to use. Schools make provision for these on a cost-recovery basis. Examples include the provision of photocopying facilities and printing facilities for computer-generated assignments and Internet downloads over and above that provided as part of course allocations.

# SUMMARY

---

The Government provides a comprehensive education that satisfies the requirements of what is determined through the School Curriculum and Standards Authority for all students throughout Western Australia. Government funding is provided to schools for the operating costs associated with the education of students. The costs include salaries of teaching and administrative staff, school buildings and facilities and certain materials. This provision accounts for a significant part of the total State budget. Some school communities also supplement the funds available to them through local fundraising.

Parents are also reminded that there are additional approved charges which are for P & C contributions, Year Book, printing and library fees.

Families may qualify for financial assistance to help with the costs of schooling. If parents have a Health Benefits & Concession card, Health Care card or Health Benefits card valid from the first day of the school year, they may apply in person through the Front Office, presenting their current card for staff to validate online. This should be carried out at the commencement of the school year.

The allowances are:

- Secondary Assistance Scheme – an allowance of \$235.00 to be taken off contributions and charges
- Secondary Assistance Scheme (Clothing) – an allowance of \$115.00 which is sent to the parent for uniforms.
- Abstudy for Aboriginal & Torres Strait Islander students (application through Centrelink – see the Corporate Services Manager).

**As required by the Department of Education, a maximum voluntary contribution of \$235.00 can be requested by schools from parents for a student selecting a program of study (three choices of options, at least one each from The Arts and Technologies).**

# EXTRA COST OPTIONS – payment of deposit ‘up front’

---

It is a requirement of the Department of Education that students are able to select a study program within the maximum voluntary contribution of \$235.00. Should students wish to study other subjects that may be classified as “extra cost options”, a further charge is applicable. This charge generally covers the cost of consumable items.

In order to gauge if there is an appropriate number of students selecting “extra cost options” for the subjects to be placed on the school timetable for 2024, the school requests that **parents pay a deposit of \$100.00 for such subjects** when completing the Subject Selection Sheet.

## Possible additional costs not currently included

Throughout the year, your child may be interested in participating in additional activities that become available but have not been planned for. Whilst it is not compulsory for students to attend such activities, should these be available, the costs listed below may provide some guide as to the costs associated with such activities.

### EXTRA COST OPTIONAL COMPONENTS OF EDUCATIONAL PROGRAMS

Description	Approximate Costs
Camps	\$100.00 - \$120.00 per camp
Leadership Camp	\$250.00
Classroom Excursions	\$20.00 - \$80.00
Competitions	\$15.00
Interschool Sports Carnival	\$80.00
School Photographs	\$20.00 - \$85.00*
Visiting Performers	\$20.00 - \$40.00

\* Price varies depending on photos purchased

# CONDITIONS OF ENROLMENT

---

1. Although the school makes every effort to accommodate each student's preferred program, organisational and resourcing issues may result in students having to re-select a subject. You will be informed should this eventuate.
2. At Karratha Senior High School, we make every attempt to assist parents in making the most appropriate selections to qualify your child for future study or desired career choices and that these subjects are within the student's capabilities.
3. **Students going into Year 10 in 2024, complete their Subject Selections Online by Friday 11 August 2023, with the required deposit for the high cost electives.**
4. Those students who do not complete their preferences before this date will most likely be allocated the listed low cost options.

# SUBJECT DESCRIPTIONS

---

## *English*

**\$40.00**

The English curriculum is built around the three interrelated strands of Language, Literature and Literacy. Teaching and learning programs should balance and integrate all three strands. Together the strands focus on developing students' knowledge, understanding and skills in listening, reading, viewing, speaking, writing and creating. Learning in English builds on concepts, skills and processes...

Students will engage with a variety of texts for enjoyment. They will listen to, read, view, interpret, evaluate and perform a wide range of texts. They will also study texts designed to inform and persuade. Texts will include various types of media texts including newspapers, magazines and digital texts, novels, non-fiction texts, comics, cartoons, poetry, fairy tales, myths and dramatic performances.

Texts studied in Year 10 support and extend students. Such texts explore themes of interpersonal relationships and ethical dilemmas within real-world and fictional settings and represent a variety of perspectives. Informative texts represent information about a wide range of specialised topics and text structures are more complex.

## *Mathematics*

**\$40.00**

Mathematics develops each student's mathematical skill, understanding and reasoning.

### **KEY CONCEPTS**

**Number and Algebra:** Number and Algebra are developed together, as each enriches the study of the other. Students explore the magnitude and properties of numbers and apply a range of strategies for computation and understand the connections between operations. Patterns are recognised and students develop an understanding of the concepts of variable and function. They build on their understanding of the number system to describe relationships and formulate generalisations. They recognise equivalence and solve equations and inequalities. They apply their number and algebra skills to conduct investigations, solve problems and communicate their reasoning.

**Measurement and Geometry:** Students develop an increasingly sophisticated understanding of size, shape, relative position and movement of two-dimensional figures in the plane and three-dimensional objects in space. They investigate properties and apply their understanding of them to define, compare and construct figures and objects. They learn to develop geometric arguments. They make meaningful measurements of quantities, choosing appropriate metric units of measurement. They build an understanding of the connections between units and calculate derived measures such as area, speed and density.

**Statistics and Probability:** Students recognise and analyse data and draw inferences. They represent, summarise and interpret data and undertake purposeful investigations involving the collection and interpretation of data. They assess likelihood and assign probabilities using experimental and theoretical approaches. They develop an increasingly sophisticated ability to critically evaluate chance and data concepts and make reasoned judgments and decisions, as well as building skills to critically evaluate statistical information and develop intuitions about data.

***Each student is required to have a scientific calculator (approximate cost \$25)***

## ***Humanities and Social Sciences(HASS)***

**\$40.00**

The Humanities and Social Sciences Learning Area covers study of **History, Geography, Economics** and **Civics**. The program has been structured to include both understanding and skills required for each unit and has been mapped to prepare students to undertake Senior School courses thereafter.

### **History**

History promotes the understanding of societies, events, movements and developments that have shaped humanity from earliest times. Through History, students appreciate how the world and its people have changed, as well as the significant continuities that exist to the present day. History, as a discipline, has its own methods and procedures which make it different from other ways of understanding human experience.

The study of history is based on evidence derived from remains of the past. It is interpretative by nature, promotes debate and encourages thinking about human values, including present and future challenges. The process of historical inquiry develops transferable skills such as the ability to ask relevant questions; critically analyse and interpret sources; consider context; respect and explain different perspectives; develop and substantiate interpretations and communicate effectively.

### **Geography**

Geography integrates knowledge from the natural sciences, social sciences and humanities to build a holistic understanding of the world. Students learn to question why the world is the way it

is, reflect on their relationships with and responsibilities for that world, and propose actions designed to shape a socially just and sustainable future.

Geography uses an inquiry approach to assist students to make meaning of their world. It teaches them to respond to questions in a geographically distinctive way, plan an inquiry; collect, evaluate, analyse and interpret information; and suggest responses to what they have learned. They conduct fieldwork, map and interpret data and spatial distributions, and use spatial technologies.

### **Economics and Careers**

Economics and Careers develops the knowledge, understanding and skills that will inform students about the economy and encourage them to participate in and contribute to it. The curriculum examines the aspects that underpin decision-making at personal, local, national, regional and global levels. Students learn to appreciate the interdependence of decisions made, as well as the effects of these decisions on themselves, consumers, businesses, governments and other economies.

The Economics and Careers curriculum is informed by four organising ideas that help in developing students' economics and business knowledge, understanding and skills; resource allocation and making choices; the business environment; consumer and financial literacy; and work and work futures. At the same time, students are exposed to and encouraged to develop enterprising behaviours and capabilities such as embracing change; seeking innovation; working with others; showing initiative, flexibility and leadership; using new technologies; planning and organising; managing risk; and using resources efficiently.

### **Civics and Citizenship**

Civics and Citizenship aims to develop student understanding of Australia's system of government with a focus on governance mechanisms and processes. A comparative study of different systems is undertaken as well as a depth study on resilient democracy and the role that this plays in ensuring a cohesive society.

The law aspect of the course considers the role of the Australian Constitution in setting the structure and powers of the Federal and State governments as well as the individual rights of Australian citizens. The course also considers the role of the High Court of Australia in solving disputes as the highest decision making body in the court hierarchy.

## **Science**

**\$45.00**

Science provides an empirical way of answering interesting and important questions about the biological, physical and technological world. The knowledge it produces has proved to be a reliable basis for action in our personal, social and economic lives.

The Year 7, 8, 9 and 10 Science course involves both practical and theory work based around Science Inquiry Skills, Science as a Human Endeavour and the four key content areas of Science Understanding. These three components are interrelated.

**Science Inquiry Skills:** Involves identifying and posing questions; planning, conducting and reflecting on investigations; processing, analysing and interpreting evidence; and communicating findings. Activities are hands-on, practical learning activities that, at times use specialized equipment in science laboratories.

**Science as a Human Endeavour:** Through Science, humans seek to improve their understanding and explanations of the natural world. Science influences society by posing, and responding to, social and ethical questions, and scientific research is itself influenced by the needs and priorities of society. Research assignments are part of this component.

## **Science Understanding**

**Biological Sciences:** Science of the living world. Students will discover the science of living organisms.

- DNA, inheritance and evolution

**Chemical Sciences:** Science of matter. Students will discover the science of the matter which makes up our world.

- Atomic structure in relation to the Periodic Table
- Chemical Equations

**Earth and Space Sciences:** The science of Earth's dynamic structure and its place in the cosmos. Students will discover the science of our planet and its place in the universe.

- Big Bang Theory and the Universe
- Global Systems

**Physical Sciences:** The science of forces and motion, and matter and energy. Students will discover the science of the physical world.

- Motion
- Energy transfer

## ***Health & Physical Education***

**\$70.00**

### **Health**

Year 10 Health provides students with the opportunity to focus on the health issues that affect the wider community. By investigating these issues, the students study the external factors which influence health decisions and the reasons why others still make unhealthy choices. By addressing this, students will develop skills to minimise risk and the communication skills to work with others. Students will also have the opportunity to attain their Learner's Permit to begin their journey to their driver's licence.

### **Key Concepts**

- Advanced Sexual Education and Pregnancy
- Keys for Life and Road Safety
- Health and Illness in Australia
- Consumer Health
- Advanced Personal Safety

### **Physical Education**

Students will continue to improve their performance in a variety of sporting contexts. They will develop their individual movement skills, tactics and strategies whilst also using feedback to improve self and others' performance. Students will be required to complete labs on Exercise Physiology and Biomechanics and demonstrate a range of tactical plays in both offence and defence.

### **Key Concepts**

- Futsal, Netball, Beach Volleyball, Athletics, Touch, SEPEP, Tennis Badminton
- Biomechanics and Exercise Physiology

***All students require a sports shirt in their house colour  
for all Physical Education classes.***

# ELECTIVE OPTIONS

---

Students in Year 10 have some choice in the subjects they study in Elective Learning Areas. Students must select THREE subjects. They must select:

- One subject from The Arts learning area
- One subject from the Technologies learning area
- One subject from The Arts or Technologies or Physical Education options

Commencing this year, students are required to complete their preferences via our online portal. Information regarding this process is located on page 21 of this booklet. This process needs to be completed by **COB Friday 11 August 2023**. Some elective subjects attract additional costs. Further information in regard to this is on Page 18.

## *Technologies*

### **Materials Specialisation: Metal - \$110.00**

Metalwork course extends the students' knowledge and ability in the areas of metal construction. Students are encouraged to develop their independent work habits, initiative and perseverance required to develop their own ideas and turn them into reality. In the second part of the year problem-solving and rational decision-making will be emphasised as the students develop their own design briefs.

### **Materials Specialisation: Wood - \$110.00**

In Woodwork students will plan and construct small furniture items for the home. They will learn to prepare and construct working designs. They will investigate ways in which different materials and processes can be used in the construction of their models and they will learn to manage tools, machinery and processes safely and efficiently. Integrated tasks will address OH&S standards, project management skills and new developments in the manufacturing industry. This course is highly practical based. This course will enable students to develop woodworking skills, plan and construct a major project, and present quality designs of possible projects. At the end of the course the students will be able to demonstrate proficiency in all areas of woodwork including, cabinet/furniture making, wood turning, basic building construction techniques and fine finishing. Projects could include coffee tables, cabinets, wood turned items, solid wood accessories, shelving, etc.

### **Materials Specialisation: Home Workshop - \$35.00**

Home workshop is a practical based course focusing on sustainability in the design process: Reduce, Reuse, Recycle. Students will complete a number of projects where they will design items for around the house. A variety of materials are used including timber, aluminium, plastics and those they have found themselves.

### **Engineering Principles: Mechatronics - \$100.00**

Mechatronics is a form of engineering that blends computer, electrical and mechanical disciplines. Students undertake a variety of projects that range from completing a series of simple tasks to solving complex problem-based scenarios. Designs focus on functionality and ergonomics within the environment. Through their projects, students will learn the importance of utilising various types of sensors to create intelligent mechanical devices.

### **Recreational Marine - \$100.00**

Recreational Marine extends the knowledge students have in the area of marine study and fully prepares them to participate in recreational maritime pursuits. Activities include: Essential user, boat and outboard care; use, repair and maintenance of a cast net, ropes – splicing and whipping (the mystery revealed), reading local weather forecasts, charts, compass and GPS. Students learn how to read the tides and moon phases in order to calculate the best times for fishing. Students learn the importance of the focus on Fish for the Future.

### **Digital Technologies - \$50.00**

This course is for students who have enjoyed Digital Technology in Years 7, 8 and 9 who would like to further their skills.

The course teaches you intermediate coding and how this can be used to solve complex problems. The skills you learn will help you understand how apps, websites and games are made. Digital Technologies also helps you understand how computer systems work and provides you with skills that will help you take advantage of today's technology.

### **Materials Specialisations - Textiles - \$50**

Students will build on their sewing skills by sampling decorating techniques to create bag tags and a set of designer coasters. We will work with different fabrics and gain an understanding of the fashion industry when completing the design brief 'In-jean-ious'. Students who take on this course will learn to produce a range of garments for themselves including sewing and screen printing a T-shirt. They will be encouraged to try new techniques and enhance their understanding of how fabrics are made through varied construction models. Design tasks will encourage them to apply their flair and creativity to enact solutions, including producing a padded laptop case.

### **Food Specialisation: Food for Social Occasions - \$100.00**

This subject allows the student to design, plan and prepare a range of delicious recipes, appropriate for a diverse selection of occasions and dietary requirements. The students will take part in an event and entertain guests during a themed function as well as prepare food to share as a gift to a charitable organisation. We will look at food trends and why we eat what we do. This is an elective which will be great for students who would like to explore career options within the hospitality industry or as a pathway to Food Science and Technology in Senior School.

## ***The Arts***

### **Visual Arts - \$35.00**

Visual Arts gives students the opportunity to produce individual projects following creating and designing procedures. In this skill-based course they will demonstrate their understanding of elements and principles of art through printmaking, painting, ceramics and sculpture. Written analysis and research tasks will help students to communicate artistic response and examine different art styles. This course is focused on developing skills that will assist students in completing Visual Arts General courses.

### **Extension Visual Arts - \$70.00**

Students develop artworks primarily concerned with experiences of themselves in reaction to given stimulus. The art focus is on developing personal identity and recognising personal choices. The use of clearly defined processes will help students to overcome technical difficulties and ensure the process of making artwork is an enjoyable one. This subject identifies how artists give personal direction to their work and how personality is the key to artistic difference. The subject looks at the fun of creation and the ability to think, plan and generate useful artistic results. Students are encouraged to generate their own personal ideas rather than mimic those of others. Extension Visual Arts will assist in:

- Understanding appropriation
- Developing awareness of aesthetics and how to control it

- Investigating how artists generate ideas
- Investigating their environment
- How to communicate and produce artistic response and examining various art styles.

This course is focused on developing crucial elements for success in Visual Arts ATAR courses.

### **Music - \$35.00**

Music students have the opportunity to learn all about the music industry. Students form their own bands and learn how to manage and promote their band, organise performances and select repertoire. They are taught how to write their own songs and to critically reflect on musical performances. They have the opportunity to develop their skills on their chosen instrument through both practical experience and a theoretical approach to music notation and harmony.

### **Drama - \$40.00**

In Year 10, Drama students are given opportunities to develop their knowledge and skills to present drama for purposes and wider external audiences, safely using processes, techniques and conventions of drama. Students develop drama based on devised drama processes and taken from appropriate, published script excerpts (e.g. Australian drama post-1960 or world drama), using selected drama forms and styles. Students will have opportunities to research devised drama and read in selected script excerpts in context. Through this, students will explore:

- Voice and movement techniques.
- Reflective written and verbal processes.
- Elements of Drama.
- Approaches to characterisation suited to the selected drama forms and styles, texts and themes.
- Stage geography, blocking notation and the impact of in-the-round and adapted stages.
- Devised drama exploring international or global themes.
- Drama practitioners such as Rudolf Laban to manipulate dramatic meaning and audience relationships.
- Production Roles: e.g. Costume Designer, Scenographer and Lighting Designer.
- Design principles (balance, contrast, repetition, pattern) selected to make meaning and add to the experience of theatre.
- Visual Elements
- Forms/Styles: Contemporary Aboriginal Theatre, YOH Fest Production, Monologues/Duologues: Absurdism, Monologues/Duologues, Realism, Epic Theatre and Poor Theatre.

### **Media - \$35.00**

Media is a creative subject that encourages and allows for personal expression. In this course, students develop the skills to understand various forms of media ranging from photography, print media, radio, television and film to the new emerging multimedia technologies. Students learn how to consider people, events and issues that are represented in the various media communications and how these representations persuade mass audiences. Students create, produce and present their own works to demonstrate their understanding of the media world. If students want to question and explore the norm and think outside the square, then the Media course is a great place to start.

## ***PHYSICAL EDUCATION***

### **Year 10 Elite Sports Program: - \$100**

Karratha SHS Elite Sports Program is available to students in Year 10 who are talented sports people. This subject will give them the opportunity to further develop as an athlete while also developing leadership skills in the sporting industry. The subject will also combine sports science concepts and lead into senior school Physical Education Studies and Certificates in Sport and Recreation. The program will include your Physical Education class and an elective class including one theoretical lesson per week. In order to be a part of this course you will need to apply and meet minimum requirements. Once part of the course you will also have to meet the expectations of the school, attend all school sporting events and participate in community sport in a voluntary capacity.

Students who would like to apply for this elective, please see the PE department for an application package.

### **Outdoor Education - \$85.00**

This is an elective for students who want to challenge themselves, develop valuable leadership skills and enjoy the Pilbara outdoors. Students will be given a fun introduction into the world of Outdoor Education.

Focus:

- Adventure games – to develop initiative, self-esteem and leadership skills
- Environmental awareness – developing minimum impact practices
- Planning and preparation – for an overnight expedition
- Risk management – safety and first aid skills
- Campcraft skills – cooking, equipment selection and set up
- Outdoor activity skills – may include mountain biking, hiking, snorkelling and kayaking.

Students must get involved in all activities and participate in an overnight expedition.

## ***BIG PICTURE***

**Cost: \$235**

The Big Picture Program is a design for learning that begins with the child and their interests and passions. It recognises that a traditional model of learning does not suit all students. The Big Picture Program allows students to learn at their own pace, be that fast or slow. As the program is not content focused, it allows students to develop skills that will prepare them for life after school and improve employability skills such as:

- Self-management, planning and organisation
- Initiative and enterprise
- Teamwork
- Communication
- Problem-solving
- Learning and technology

The core principles that underpin this unique education program are:

- Learning must be based on a student's interests and needs.
- Students must connect with adult mentors from the broader community who share their interests and support learning.
- Students' development and abilities must be measured by the quality of their work and how this work changes them.

Students spend up to 16 hours per week in their advisory and participate in elective subjects as well as HPE classes. Led by an advisory teacher, the program also relies on the involvement of a child's family, emphasising the impact that relationships can have on a child's engagement with learning. Students work with their families and advisory teacher to set goals and create individual learning plans.

Entry into the Big Picture Program is via application, with forms being available from the school.

## **STARS FOUNDATION**

**Cost \$80.00**

**Stars Foundation provides a holistic program that supports Indigenous girls and young women to attend and remain engaged at school, complete Year 12 and move into full-time work or further study.**

Stars has been offering full-time, in-school support programs for Aboriginal and Torres Strait Islander girls and young women in the Northern Territory, Queensland and Victoria since 2015. During that time the program has achieved consistently outstanding outcomes, with more than 90 per cent of senior students completing Year 12 in each year.

### **How Stars Works**

The Stars program model is based on strong trusting relationships. The Stars Room provides a culturally safe, warm environment – a place where the girls and young women in our programs feel nurtured and inspired.

Our full-time Mentors provide a diverse range of activities to support Stars students to develop the self-esteem, confidence and life skills they need to participate successfully in school and move into a positive and independent future.

We provide a culturally safe, nurturing environment in a dedicated 'Stars Room'. This means that the girls and young women in our programs can access the intensive support they need, when and where they need it.

### **The Stars Model**

The Stars program is based around four key pillars of personal development:

- Education, Training and Employment
- Healthy Lifestyles
- Wellbeing
- Community, Culture and Leadership

Stars offers personal development activities and experiences in many different areas, including academic support, personal health and wellbeing, music, drama and dance, art, cooking and nutrition, and exercise and sport.

Students also take part in community, cultural and volunteering activities to build their life-skills and confidence and further develop their links to culture and community.

Stars has a strong focus on successful transitions from school into full-time work or further study. Both before and after graduation, our full-time Transitions Managers provide intensive support to help our young women move successfully into full-time employment, training or tertiary study. For more information, visit the Stars Foundation website

<https://starsfoundation.org.au/>

## CLONTARF

**Cost: Free**

The Clontarf Foundation exists to improve the education, discipline, self-esteem, life skills and employment prospects of young Aboriginal and Torres Strait Islander men and by doing so, equip them to participate more meaningfully in society.

The Karratha Clontarf Academy provides support and mentoring to all Indigenous males enrolled at Karratha Senior High School. The Academy has six full time staff based at the school with two Academy rooms. It focuses on six key pillars:

1. Education
2. Sport
3. Well-Being
4. Employment
5. Leadership
6. Community

All of these pillars are at the forefront during our planning of activities. Such activities include weekly morning training sessions, Academy lunches, work-site tours, guest speakers, volunteering at community events, camps (at least one per year group per term), afterschool excursions and morning pick-ups.

# SUBJECT SELECTIONS ONLINE

---

Students are required to complete their preferences via our online portal at:

<https://client.subjectselectiononline.com.au/?school=4422t>

Students must follow the instructions throughout the site and identify their chosen Elective Subjects.

Students still have 3 options for elective subjects. These courses will run for the entire year.

*Students who choose either Clontarf or Stars Foundation will choose only Option 1 and Option 2.*

To login for the first time, use the forgotten password link, enter the email address supplied to the school upon enrolment of your child and you will receive an email stating your login code (Student Number) and a prompt to set your password.

This process needs to be completed by **COB Friday 11<sup>th</sup> August 2023**. If you have any questions about the 2024 Elective Selection process, please contact the school on 9182 6900.

# WHO CAN HELP YOU

---
